

TECHNICAL DATA REPORT

HS 0112

STAT-EZE 100 **Anti-Static Compound for Institutional Applications**

DESCRIPTION:

Clear mobile liquid with faint odour of alcohol.

PURPOSE:

To neutralize static electricity and eliminate shocks and sparks.

HOW TO USE:

For large carpeted areas, apply **STAT-EZE 100** with a pressure sprayer. Apply in a fine mist. Hold spray wand upwards at least one metre above surface and let spray mist drift downward on carpet nap. Do not wet or saturate carpet pile or fabrics. Do not spray directly on carpeting or upholstery. For hard surfaces, spray lightly and remove any excess with a dry, clean cloth.

COVERAGE: One litre of **STAT-EZE 100** will treat 40 to 50 square metres depending on the surface to be covered. One application of **STAT-EZE 100** will last for weeks; however, length of effectiveness will vary depending on the material and usage of the surfaces. **STAT-EZE 100** should be reapplied after cleaning or whenever there is evidence of renewed static build-up.

PRINCIPAL USERS:

Hotels, hospitals, churches, office buildings, car dealers, paper industries, printers, dry-cleaners.

ADVANTAGES:

- 1) Quick drying, leaves no oily or greasy residue.
- 2) Repels dirt, dust and lint from treated surfaces.
- 3) No odour, non-fuming.
- 4) Non-staining on fabrics when used as directed.
- 5) Easy to apply.
- 6) Contains biodegradable ingredients.

PRECAUTIONS:

Do not get in eyes. Read Material Safety Data Sheet.

SPECIFICATIONS:

pH (Concentrate)	6.5 - 7.5
Density at 20°C	1.00
Physical Form	Clear liquid
Colour	Colourless
Odour	Odourless
Stability	Stable between -17°C and 55°C
