## MARMITEX Liquid Detergent for Pots and Pans

### DESCRIPTION:

MARMITEX is a viscous yellow high foaming liquid.

### PURPOSE:

MARMITEX is a concentrated, pH balanced high sudsing detergent for use in food service operations for washing pots and pans, dishes, or as a general cleaner on floors, walls and equipment.

### HOW TO USE:

As a pot and pan washing detergent, MARMITEX is easy on the hands but tough on baked on food soils. Its pleasant lavender scent and long lasting suds give both economy and effectiveness in a hand use situation, from 60 ml up to 120 ml per 50 Litres (2 to 4 oz. per 10 gallons). MARMITEX is an excellent all purpose cleaner at very low concentrations of 30 to 60 ml per 50 Litres (1 to 2 oz. per 10 gallons) MARMITEX can be economically dispensed direct from the container with our DEMA proportioner.

### PRINCIPAL USERS:

Restaurants, institutions, hospitals, hotels, etc.

### ADVANTAGES:

- 1) Completely soluble in hot or cold, hard or soft water.
- 2) Free rinsing from all surfaces, no spotting or streaking.
- 3) Excellent cleaning action on all types of soil.
- 4) Contains water softening agents which sequester hard water salts, and prevent film build-up on china and plastics.
- 5) Mild to the hands.
- 6) Non-corrosive, even on aluminum.
- 7) Complies with Fed. Standard 2-GP-19 (1992).
- 8) Approved for Canadian Food Plant Use, file # M375 c1.
- 9) Completely biodegradable.

### PRECAUTIONS:

Do not get in eyes. Keep out of reach of children.  
Read Material Safety Data Sheet.

### SPECIFICATIONS:

Physical form	Clear yellow liquid
Density at 25°C	1.04
pH (concentrate)	6.5 - 7.5
Foaming	Very high
Rinsability	Excellent
biodegradable	Yes
