

TECHNICAL DATA REPORT

HS 0701

DOUBLE SHOT Concentrated Liquid Drain Opener with Odour Mask

DESCRIPTION:

DOUBLE SHOT is a blend of concentrated sulphuric acid and powerful odour counteracting solvents.

PURPOSE:

DOUBLE SHOT will dissolve nearly all foreign materials in drains and toilets, such as paper, hair, rags, soap, styrofoam, wax, cigarette butts, and cellophane. The sulphuric acid liquefies the materials and the solvents prevent sulphurous odours from escaping in the atmosphere.

HOW TO USE:

Small drains - up to 5 cm (2"): 250 ml. (8 oz.)

Floor drains - up to 10 cm (4"): 1000 ml. (32 oz.)

Toilets: 500 ml. (16 oz.)

Add suggested dosage to the drain. Always add DOUBLE SHOT slowly down sides of toilets, drains, etc. Allow to stand for 15 minutes, then flush with large amounts of cold water to clear drain of acid. Do not pour into standing water or completely plugged drain. Always use cold water to flush drains, this reduces the amount of heat generated.

NOTE: Suggested dosage recommendations are general and may be varied depending on conditions, type of obstruction, and size of traps and lines.

MAIN USERS:

All types of public buildings, schools, hospitals, institutions, garages and industrial companies, service stations, repair shops, municipalities, homes, plumbing supply companies, plumbers and hardware stores.

ADVANTAGES:

- 1) Economical.
- 2) Can be used without danger for iron, copper, brass, Pyrex, glass, rubber, plastic, polyethylene and polyvinyl chloride drains.
- 3) Works quickly and without fumes.
- 4) Does not boil over.
- 5) Easy to store and handle.
- 6) Dissolves grease, food, hair, cloth, cigarette butts, sanitary pads and accumulation of hard deposits of soap, etc. in sink pipes, bath-tubs, toilets, urinals, floor drains.
- 7) Safe for septic tanks and drain tiles.

PRECAUTIONS:

DO NOT USE WITH ANY OTHER PRODUCT OR WHERE OTHER PRODUCTS HAVE BEEN USED.

EXTERNAL: If splashed in eyes or on skin flush thoroughly with water for 15 minutes, then cover with moistened sodium bicarbonate. **GET MEDICAL ATTENTION IMMEDIATELY.** If splashed on clothing remove and wash them immediately.

INTERNAL: If swallowed, give solution of milk and sodium bicarbonate, milk of magnesia or egg whites beaten with water or three to four glasses of milk. **DO NOT INDUCE VOMITING. GET MEDICAL ATTENTION IMMEDIATELY.**

Read Material Safety Data Sheet.

SPECIFICATIONS:

pH 0.5 - 1.0, very acid

TECHNICAL DATA REPORT

Density at 25°C	1.840
Physical form	Slightly transparent liquid
Colour	Red/Yellow
Odour	Pleasant
Active ingredients	93 - 98%
Solubility	Water soluble with heat generation
Stability	Stable between -25°C & 49°C
Viscosity at 25°C	5 - 20 cps Brookfield (as is)
