

TECHNICAL DATA REPORT

HS 1002

120-DAY BOWL CLEANER In-Tank Bowl Cleaner

DESCRIPTION:

Medium sizes jar containing a blend of calcium hypochlorite and marble chips.

PURPOSE:

Special chemical formula which keeps any toilet operated from a flushing tank clean and sanitary for at least 120 days.

HOW TO USE:

Clean toilet bowl thoroughly with SANIFECT, especially under the rim and flush. Perforate the label on lid and place the jar right side up on the bottom of the water tank, underneath the tank float. If jar does not fit, bend float arm sideways so as not to alter float level. For best results, clean the bowl and tank after one week to dislodge any marks or soilage which will then have become loosened. Thereafter, with the 120-Day Automatic Bowl Cleaner the bowl will remain permanently clean.

PRINCIPAL USERS:

Hotel, motels, restaurants, hospitals, institutions, industry and wherever toilets are fitted with water tanks.

ADVANTAGES:

- 1) The 120-Day Automatic Bowl Cleaner removes rust from toilet bowl and flush tanks, removes algae, mould and organic material, fouling, etc.
- 2) The 120-Day Automatic Bowl Cleaner will reduce and gradually remove iron and mineral deposits whilst it is in regular use.
- 3) The 120-Day Automatic Bowl Cleaner thoroughly cleans, sanitizes and deodorizes the bowl, all in one simultaneous operation.
- 4) Cleans with every flush with chlorine cleaning action.

PRECAUTIONS:

Avoid contact with eyes, contains active chlorine releasing agents. In case of contact with eyes, flush for 15 minutes with water and get medical attention. Can cause skin irritation, wear rubber gloves when handling material. Do not mix with anything but water, especially do not mix with acidic products such as SANIFECT or any other toilet bowl cleaner. Keep out of reach of children. Read Material Safety Data Sheet.

SPECIFICATIONS:

Physical form White powder
Odour Chlorine
Solubility Complete in hard or soft water
