HS 2820

D'FOAM EG

Liquid Defoamer for Egg Washing Operations

DESCRIPTION:

White opaque, viscous liquid without odour.

PURPOSE:

D'FOAM EG is a quick and effective silicone based defoaming and foam control agent for use in hatcheries and egg processing plants.

HOW TO USE:

EGG WASHING OPERATIONS: Add D'FOAM EG periodically or continually to the wash tank at a rate of 15 ml per 100 litres of water. Do not use more than 25 ml. per 100 litres of wash water. The amount needed will vary with the system used and the types and amounts of detergent used. Eggs coming in contact with wash water containing D'FOAM EG must be rinsed with potable water.

TRAY WASHING: Use 15 ml of D'FOAM EG per 400 litres of water in recirculating tray washers. Repeat as necessary to maintain the desired level of foam control.

PRINCIPAL USERS:

Hatcheries, egg cleaning, and egg breaking plants.

ADVANTAGES:

- 1) Economical in use dilution.
- 2) Works at any temperature.
- 3) Safe to all types of material.
- 4) Effective in hard or soft water.
- 5) Biodegradable.
- 6) Approved for Food Plant Use, file # P216, s1, LL3.

PRECAUTIONS:

D'FOAM EG is not a controlled substance under W.H.M.I.S.
Read Material Safety Data Sheet.

SPECIFICATIONS:

Physical form	Thick white opaque liquid
Density at 25°C	1.0
pH (concentrate)	6.8 - 7.2
Rinsability	Excellent
Biodegradability	Yes
