

TECHNICAL DATA REPORT

HS 2911

PS-99

Poultry Scalding Compound

DESCRIPTION:

PS 99 is a viscous liquid used to decrease the surface tension of water.

PURPOSE:

To make scald tank water penetrate and wet the skin of poultry and help remove pin feathers and cut feathers, increasing the grade of poultry.

HOW TO USE:

Dilute 1 part of PS-99 per 640 parts of water in scald tank.

MAIN USERS:

Poultry plants, dressing chickens, broilers, ducks, geese, turkeys, and game birds.

ADVANTAGES:

- 1) Economical in use dilute.
- 2) Removes pin feathers and cut feathers, increasing the grade.
- 3) Leaves birds looking cleaner and easier to market.
- 4) Reduces dressing time of operation.
- 5) Safe on skin and equipment.
- 6) Rinses easily.
- 7) Biodegradable.

PRECAUTIONS:

Do not get in eyes. Keep out of reach of children. Read Material Safety Data Sheet.

SPECIFICATIONS:

Density at 25°C 1.01
Physical form Translucent liquid
Stability Stable between -40°C & 38°C
Flammability No flash - or fire point
Biodegradable Complete
