

TECHNICAL DATA REPORT

TI 2120

FACILE - FACILE **Non-Flammable Penetrant and Release Agent**

DESCRIPTION:	An aerosol that penetrates through rust, scale and corrosion to free frozen parts quickly.
PURPOSE:	Use on threads, tightly fitted parts, nuts, sliding and rotating parts, bolts, hinges, pins, shafts, etc. Leaves a non-drying residual coating that protects against renewed corrosion. Makes part removal easier without breakage or thread stripping.
HOW TO USE:	Saturate part and area of contact. Allow to set for several minutes before attempting to break free. For parts that will not release or are heavily encrusted, the aid of a wire brush may be needed. To ensure ease and removal in the future, coat parts while assembling and make periodic checks to determine need for reapplication.
PRINCIPAL USERS:	Transport companies, garages, ready-mix companies, excavation contractors, paper mills, lumber and saw mills, refineries, etc.
ADVANTAGES:	<ol style="list-style-type: none">1) Easy to use aerosol.2) Two in one product, loosens nuts and bolts and lubricates parts3) Non-flammable.4) Conforms to MIL Spec C-23411
PRECAUTIONS:	Contents under pressure, do not puncture or incinerate container. Use in a well ventilated area. Read the material safety data sheet. Keep out of reach of children. Read Material Safety Data Sheet.
SPECIFICATIONS:	Flammability Non-flammable Approval Meets MIL Spec C-23411
