**IV. FIRST AID MEASURES****Contact with skin:** Wash off in flowing water or shower. Wash contaminated clothing before re-use. Seek medical attention as soon as possible for all burns regardless how minor they may appear initially.**Contact with eyes:** Immediately flush with large quantities of water for 20 to 30 minutes. Hold eyes open while flushing. Call physician. Continue flushing water up to 1 hour during transport to a medical facility.**Inhalation:** Not applicable.**Ingestion:** Drink one glass of water immediately. **Do not induce vomiting.** Call Regional Poison Control Centre at once or see your local hospital emergency at once.**V. FIRE FIGHTING MEASURES****Conditions of flammability:** Not applicable.**Means of extinction:** Not applicable.**Hazardous combustion products:** Not applicable.**Unusual fire and explosion hazards:** Non combustible material; contact with some metals may generate hydrogen gas.**VI. ACCIDENTAL RELEASE MEASURES****Procedures to be followed in case of spills or leaks:** Do not allow chemical to enter sewers or waterways. With large spills, dike for later disposal. Evacuate upwind; wear protective clothing, dilute spilled acid to reduce fumes, neutralize. Protect metal structures from acid.**Personal protective equipment to be used:** Protective gloves and safety glasses.**VII. HANDLING AND STORAGE****Special handling procedures and equipment:** Smoking or open lights should not be permitted near open drums, tank trucks, or storage tanks. Use explosion proof lights and flashlights. When diluting, always add acid to water, never water to acid. Heat is generated upon dilution.**Specific storage requirements:** Do not store near excessive heat or open flame. Store in closed containers. Do not freeze.**VIII. EXPOSURE CONTROL/PERSONAL PROTECTION****Respiratory Protection:** Not applicable.**Protective Gloves:** Viton or neoprene.**Eye Protection:** Chemical safety goggles to prevent eye contact.**Additional Protective Equipment:** Rubber boots, coat and pants; safety shower and an eye wash facility should be available.

**Ventilation:** General ventilation with a good source of make-up air recommended for all indoor situations. Local ventilation recommended at source of contamination generation. Ventilation should be adequate enough to maintain air concentrations below the designated exposure limit.
